NATURE'S SLEEP

FOREWORD ABOUT OUR BUSINESS PHILOSOPHY AND OUR LOGO

Even though it's been only 2 years since Innova Bedding Founded. It's business ideas and foundations are rooted way before. Both our business ideas and our history in bedding industry shows itself on our logo with it's roots under the tree of life.

Being tree of life assimilated in almost every idea systems, religions and trends for long years shows that Innova Bedding's international relations and multi-cultural structure.

Our specialisation in natural, organic and innovative products represents our philosophy on protecting earth and leave a clean World for future generations. Unconditional giving virtue in tree of branches, body and it's shadow represent the the Innova Bedding's pursuit of being a social company. And the opportunity of tree growing to the limits of sky expanded Innova Bedding's vision of growing with effort to the horizons's limit.

Now is the time for growing our own tree's of life and become a forest with you, our precious business Partners.

We hope for you to like our catalogue which we try to present with utmost care and we wait impatiently to work with you.

INNOVA BEDDING

INNOVA BEDDING PRINCIPLES

"Naturally Innovative"

SUSTAINABILITY

Sustainability can also be defined as a socioecological process characterized by the pursuit of a common ideal. Ideality, by definition, is not attainable for a particular place and time. However, by approaching it persistently and dynamically, the process can create a sustainable system. Ecology science believes that sustainability is achieved by the balance of species and surrounding resources. In order to achieve this balance, existing resources should not be consumed faster than natural production.

BIODEGRADABLE

Biodegradability is a substance that is destroyed by biological means by various microorganisms or enzymes in nature and separated into its natural components, and then can participate in this cycle in nature again. All raw materials of Innova Bedding are 100% natural and provide biodegradability in natural processes in the ecological cycle.

NATURAL

With Innova Bedding, the perfection of sleep stems from the perfection of nature. All the raw materials used in the layers are one hundred percent natural. Raw materials obtained from various regions of the world take into account the human and environmental health of the region where they are grown and produced. Therefore, it has been produced in the best conditions and the most natural ingredients have been selected.

ORGANIC

Organic aims to protect the environment. It gives back to nature what it has taken from nature and aims to ensure the continuity of agriculture. In fact, it is the product of a collective philosophy and a way of life that has begun to protect the interests of employees. Organic products do not disturb the natural balance of your body, they give vitality. It is completely obtained from organic plants in nature. It does not contain any pure and unnatural substances.

ENVIRONMENTAL AND GREEN PRODUCTS

The term recycling is the recycling of unusable and recyclable waste materials into the manufacturing processes as raw materials with various recycling methods. First of all, the need for raw materials is reduced so that the consumed materials can be recycled. Thus, the increase in consumption in parallel with the increase in the human population prevents the deterioration of the natural balance and the damage to the nature. However, the reuse of recyclable materials as raw materials makes it possible to save a great deal of energy.

The circular economy is an industrial term that refers to the transformation and recycling of the industrial economy rather than the process of production, use and destruction. These cycles are based on the conversion of synthetic material wastes into materials that offer the same function or into another material that offers another function and is also recyclable. At the same time, it is also based on the reintroduction of natural materials into biomass.

VEGAN

Innova Bedding producing vegan mattresses and sleep products by using cotton, cocofiber, bamboo, linen, hemp.

HANDMADE

Innova Bedding both respects the roots of nature and strives to bring a modern sleep comfort brand to the world. Innova Bedding are handmade beds that are produced using excellent timeless craftsmanship and innovative methods.

Provide the Best Mattress Climate

WHEN IT COMES TO MANAGING THE MOIST

WE DESIGN

For the Future

How we design and manufacture products today shapes the World we live in tomorrow.

It ensures the optimization of the existing material chemistry for human, environmental health and safety. It optimizes product design and manufacturing processes to recover or reuse materials that are novelty of materials that are both safe and circular. It supports infrastructure innovation and designs Innova Bedding mattresses using only 100% natural raw materials to enable the process of recovering and reusing materials from one product life cycle to the next.

Perfect Comfort Experience
WOOL MATTRESSES

MATERIALS

From Past to Present WOOL MIRACLES

The story of wool goes back thousands of years. Both the Baillian and the Egyptians wove wool. However, wool was used not only as a clothing product, but also as a bedding product. The heat ability of wool and its quality of protecting you continue today, both while sleeping and awake. The filling material of the wool has been carefully calculated in combinations. With the use of cotton and horsehair, it offers heat control feature and unmatched natural flexibility in our mattresses.

Sheep wool is an elastic and animal natural fiber with a high water absorption capacity. Thus, it significantly improves the room ambiance and the fibers are never really damp. Fabrics keep you cool in summer. Innova Bedding uses pure new wool for its mattresses and for its filling. 100% pure wool is obtained from live sheep and is not chemically treated. It is obtained from free-range sheep. This makes them much more durable and provides better flexibility.

Towards Perfect Sleep
AND TOUCH

Innova Bedding mattresses are prepared by combining nature's best quality materials for natural sleep. This is why mattresses produced with a sense of responsibility towards the future have distinguished characters. The hands that touch our beds, which offer a more outstanding sleep than the other, are craftsmen who have been experienced for many years, and this perfect sleep is prepared only with their impeccable touch.

Only From Nature

With "Innova Bedding No1", you will find many traces of comfort from nature while you sleep. This mattress, supported by sleeping layers with the perfect moisture method, was perfectly optimized in the hands of Innova Bedding mattress artists in accordance with the human anatomy.

HANDMADE

*By the Hands of
Innova Bedding Masters*

Style, elegance and attention to detail, attention to detail from start to finish, that's what Innova Bedding is! Innova Bedding mattresses are the first luxury mattresses produced in Turkey with their unique pressure relief, perfect back support, natural raw materials with international quality certificates and perfect handmade designs.

Innova Bedding is a handmade bedding brand in Turkey with the efforts of real masters. Innova Bedding both respects nature and strives to bring a modern sleep comfort brand to the world. Innova Bedding mattresses are handmade mattresses produced using excellent craftsmanship and innovative methods. It is inspired by nature and provides you with a unique sleep experience. It is a labor of love performed by true masters who focus on every cut, every stitch, every piece of material.

Yes, we make beds, but Innova Bedding has always been passionate about sleep and its contribution to the body and soul. One of the actions that make a difference in life is sleep, and it's a natural cycle in which you can't use or buy pills to replace sleep. You can't fool yourself into getting a great night's sleep, but there are some things you can do to understand why the best way to give yourself a great night's sleep is important and how to achieve it.

P.S

The quality of the raw materials you use is the starting point of Innova Bedding comfort. Soft cotton hand-treated wool, extremely durable bag springs and the most comfortable natural surfaces help you have a peaceful sleep experience. All of our mattresses use natural materials that can breathe and are compatible with the human body and nature.

Materials such as horse mane, wool, cocamat and cotton take the shape of your body. In addition to giving you a comfortable sleep experience, it also regulates the bed temperature. The regulated bed temperature ensures that sweating is reduced to the lowest level and the quality of deep sleep increases.

MATERIALS

EVERYTHING IS IN ESSENCE AND NATURAL

Thanks to Latex

Latex is a milky plant extract secreted by many plants in nature and solidifies when it encounters air. A mattress made of latex is the starting point for healthy and natural rest. Like many natural materials, latex is naturally hypoallergenic. It is antibacterial and dust-proof, and eliminates odors thanks to its excellent self-ventilation.

A mattress is the first and most important step towards a healthy sleep pattern and a healthy lifestyle. Latex offers the most suitable sleep experience. Thanks to its natural supportive system, it is a durable and ecological investment in your health, happiness and well-being. Painful mornings are a thing of the past with a latex sham. Over time, many mattresses can lose support and often result in poor quality sleep. The support with latex is long-lasting.

Latex is famous for its flexibility and always returns to its original shape. The result is only minimal loss of height and stiffness over the years.

Thanks to its open cell structure, it has millions of microscopic small air holes and allows the latex to breathe by supporting it highly. It provides continuous ventilation. This helps your body cool down in the summer and stay warm in the winter.

Latex Ease

Latex material has a relaxing and relaxing function on the muscle structure. It is a healthy raw material accepted in the world because it is completely natural. A mattress that is too hard or soft puts the spine in a different position than it should be, which causes restless sleep and pain. However, this negative situation is not encountered in natural latex mattresses and offers you maximum comfort. However, thanks to its high air permeability structure, it will have the comfort that will keep you refreshed and away from bed bacteria for many years.

MATERIALS

CHOOSING THE RIGHT BED

"For a healthy spine, we should choose a mattress suitable for our body type."

Some mornings, no matter how much we sleep, we wake up tired and walk around with our backs stiff all day.

Have you ever thought that your bed might be responsible for this?

Stating that for a healthy spine, it is absolutely necessary to choose a quality mattress that is suitable for our body type, and draws attention to the fact that the right mattress should align and support the spine on a straight line, regardless of the sleeping position of the sleeper. According to experts, the positions we take during sleep also change this alignment and support. For this reason, it is important that the bed adapts to these changes. The mattress needs to support and maintain the shape of your spine. We don't notice much, but proper posture is important while sleeping. The muscles and ligaments around our spine need to relax and recover while we sleep.

If a mattress is too firm or too soft, these structures around your spine will not relax. Adequate hardness should be sought, which varies from person to person. For example: People with wide hips prefer a slightly softer mattress and keep their spine in line to prevent possible back and waist pain. People with narrower hips may be advised to choose a firmer mattress. If you are unsure, choose a "medium-hard" mattress. In a study of more than 300 people with low back pain, it was shown that those who used "medium hard" mattresses for 90 days had less discomfort.

PERFECT ANATOMIC SUPPORT

With Pocket Spring Systems

Innova Bedding No.5 Mattress provides you with superior comfort in every sleeping environment. Pocket Systems, which are placed in covers made of completely natural organic cotton and do not contain any petro-chemicals, have smart spring cores to provide optimum support. This combination of spring and organic cotton is the perfect blend for luxurious comfort and provides endless pressure-relieving support for your body with supportive anatomical layers. So you will wake up refreshed and rested.

In addition to being strong and durable, coconut fiber also has air-conditioning properties. Coconut fiber prevents the formation of bacteria and fungi, does not contain moisture and provides a dry sleeping environment. It evenly distributes the load of the body. All you have to do is have a perfect sleep experience.

It invites you to discover the mysterious spirit of the coconut shell for a different sleep experience you have never experienced. With its layer of coconut shell fibers, natural latex filling and organic cotton fabric, it adds the beauty and confidence of natural life to your sleep.

SOFT GIFT OF NATURE

Natural Cotton

Offering great comfort and breathability, Innova Bedding's soft cotton keeps the air dry and comfortable in a healthy sleep environment by allowing air to circulate around your body. These benefits help you fall asleep faster and stay in deep sleep for longer.

MATERIALS

FRESH SLEEP

With Breathing Cottons

People breathe not only with their lungs, but also with their skin. There are 7 million pores in each of us that breathe and remove toxins from our body. To stay dry and comfortable, it's important to sleep in a mattress that breathes and creates airflow around your body.

You've probably noticed how fresh and dry you feel on a hot summer day when you wear a cotton t-shirt or blouse rather than an outfit made of synthetic materials. This is due to the breathable structure of cotton that removes both sweat and high humidity. During the night, 98% of your sweat is water, so if you use a bed sheet that breathes and creates that effect, moisture evaporates easily.

Using non-porous synthetic material such as rubber, polyester or other synthetics makes ventilation very difficult. In a hot and humid environment, the formation of bed worms accelerates.

It is the perfect complement to cotton horsehair for the whole body to breathe comfortably. It is soft, strong and sympathetic.

COCO

MATERIALS

Coconut fiber is a very hard and at the same time elastic material. The fiber hardly wears out over time. Coir is a product that adapts naturally to the human body. Fiber is obtained from the shell of the coconut fruit, which is a very common source. Coconut trees grow on more than ten million hectares of land in the tropics. A very small part of the resulting crop is used in the industrial area. The food industry is the main consumer and focuses on the inside of the coconut. Fibers are used only as a by-product. We always provide this valuable raw material with a new purpose.

In life.

It is hypoallergenic, antibacterial and resistant to moths due to the latex essence that we spray on the coconut plate, making it perfect for people with allergies to the product. Natural latex is a completely renewable material. Coir is a product that adapts to the human body. With coir we feel as comfortable as with wool or horse hair. We offer this product to our valued customers in two ways. As cocolok and coir.

Cocolok is a coir blended with latex and contains the advantages of both coconut and latex.

BIODEGRADABLE
Raw Materials

BIO

Innovabedding produces environmentally friendly, biodegradable mattresses and recyclable mattresses with their natural identity without harming the planet.

Biodegradability refers to the ability of a product to be recycled by natural organisms (bacteria, algae, fungi) into non-hazardous products (water, CO₂) in the natural process.

Naturally Comfortable

Innova Bedding uses 100% natural raw materials in its mattresses. People think that most of their life is spent in sleep, and they do not include any industrial raw materials that will harm human health in their beds. Therefore, you naturally experience comfortable sleep at the highest level.

FEEL THE NATURE
With Innova Bedding Sleep

Natural sleep means body and mind renewal. If you can't rest and replenish your energy better than a perfectly constructed bed in another bed. What could be more logical than considering your health when choosing your mattress? Experience and natural materials play the main role here.

Experience the unique sleeping climate in a bed made by Innova Bedding. Nothing else comes more natural.

Coco Vega

Coco Vega

It is designed with 100% organic fibers that do not harm human health and nature.

Coconut mattresses are moisture resistant. Unlike polyurethane foam mattresses, which tend to absorb and retain moisture, they pass moisture through, allowing moisture to disperse more easily from your mattress. Trapped moisture allows mold growth and attracts insects. The water passes easily through our coconut fiber, allowing it to evaporate, and coconut germs naturally repel bedbugs.

NATURAL PILLOWS

BAMBOO

Designed with natural bamboo fiber filling. Bamboo Pillow creates an uninterrupted sleep experience, especially on hot summer days, with its extra moisture absorption feature and quick drying advantage. It maintains the moisture balance of the body by providing high air circulation. It is antibacterial and antiallergenic.

SPAGETTI

Thanks to the spaghetti latex it contains, it does not collapse and is long-lasting. Air permeability is high both because of the knitted fabric and because of the gaps of latex spaghetti. Joint and neck pain is minimized thanks to latex and latex fillings. Thanks to its natural content, it helps for a healthy sleep.

NECK PILLOW

100% Latex neck support pillow provides the right support to the neck area throughout the night. Thanks to its natural porous structure, it takes air and does not sweat. It is anti-bacterial and anti-allergic. Its elasticity is very high. It does not collapse like Sponge Visco or Fiber pillows. It maintains its elasticity throughout the night. Suitable for all sleeping positions.

NATURAL PILLOWS

NATURAL
LATEX

Made of 100% Natural latex. It provides a cool sleep experience thanks to its air channels. Provides unmatched support for the head and neck. It is anti-bacterial. It is not easily deformed. It is suitable for all sleeping positions.

NATURAL
COTTON

The natural softness and comfort provided by the cotton structure used in both the outer cover and the filling of the cotton pillow come to the fore. With its breathable and moisture-absorbing design, it offers a healthy and comfortable sleep experience for 4 seasons.

NATURAL
WOOL

Combining a cotton fabric with high air permeability with a special wool filling, the wool pillow offers the healthy and natural environment that the body needs during sleep at the maximum level. It creates a natural and healthy sleep environment.

NATURAL WOODEN BEDSTEAD

His strength is from nature.

HIS STRENGTH IS FROM WOOD

Hornbeam is an indispensable tree for furniture making due to its durable and hard timber structure. As it can be understood from its very high quality and durability, hornbeam wood is very difficult to break and therefore it is difficult to process.

It is a type of tree that is both robust and requires more workmanship. The hornbeam tree, which is used safely even in shipbuilding, is indispensable for the bedsteads of Innova Bedding designs. The durability and quality sought for the longevity of the furniture can be achieved with hornbeam wood.

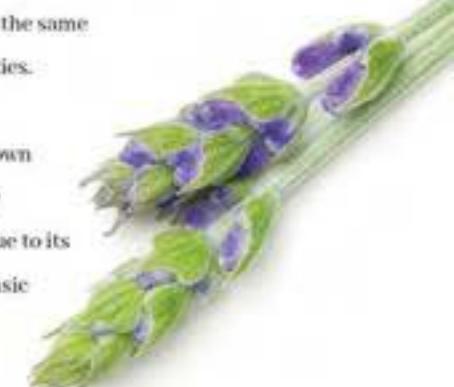

LAVANDERS

TIME TO CALM DOWN WITH
Innova Bedding Lavenders

Lavender, which has pain-relieving properties, has been preferred in herbal treatment methods centuries ago. At the same time, lavender comes to the fore with its calming properties.

It has been the subject of research and the most well-known benefit is that it has a calming feature. Lavender is a very successful plant in solving the problem of depression. Due to its regenerative properties of nerve cells, it can eliminate basic problems such as stress.

INNOVA BEDDING ORGANIC MATTRESS LAYERS

International Certificates

Global Organic Textile Standard (GOTS) was developed by leading standard setters to define globally recognized requirements for organic textiles. GOTS certified textiles, From the harvesting of raw materials to environmentally and socially responsible production and labeling, it provides reliable assurance to the consumer.

Euro Latex ECO-Standard for 2-Latex foam mattress was developed by European Latex Foam Manufacturers in close cooperation with TÜV Germany. This standard sets the maximum acceptable limits for acceptable for harmful substances that may be present in Latex mattress cores. This standard tests the presence of the following materials in the mattress:

Heavy metals, nitrosamines, pesticide solvents, volatile organic compounds.

The value of the Euro Latex ECO-Standard2 is officially recognized by the European Commission. Sunday mattresses use latex that is voluntarily committed to this certification to provide customers with verifiable safe products.

There are many labels for textiles. The most well-known conformity mark is the OEKO-TEX standard. Our mattresses must meet certain quality criteria. One of these criteria is certification that the product has been tested for harmful chemicals. For this purpose, special requirements are checked, such as exclusion of allergenic disperse dyes, strict regulation of formaldehyde, and verification of good color fastness (especially perspiration and rubbing fastness). The pH value should also be skin friendly. We attach great importance to the fact that the materials we use in the area close to the skin comply with this standard.

In LGA tests, certain aspects of the products are tested by experts, depending on the product and the regulatory environment. From washing machines to household appliances, from furniture to toys, testing services check safety, features, usability, performance, electromagnetic compatibility (EMC) and hygiene.
